

SARA SULTAN ALHARTHI

INFORMATION TECHNOLOGY STUDENT | PASSIONATE ABOUT CYBERSECURITY ,PROGRAMMING, AI & UI/UX DESIGN

+966 55 524 6631 | sasualharthi29@hotmail.com | [LinkedIn: Sara Sultan Alharthi](#)

PROFESSIONAL SUMMARY

As an IT student, I aspire to develop my skills in programming, cybersecurity, artificial intelligence, user interface and user experience (UI/UX) design, as well as front-end and back-end development. I am a highly self-motivated individual with a deep passion for learning and growth, and a constant desire to evolve. I strive to gain practical experience that enables me to translate academic knowledge into practical, real-world solutions. I am particularly interested in practical application and contributing to inclusive and collaborative work environments.

EDUCATION

Bachelor of Computer Science in Information Technology

King Abdulaziz University – Jeddah, Saudi Arabia

Expected Graduation: 2026

GPA: 3.74 / 5

SKILLS

- Programming (Java)
- UI/UX Design (Figma)
- Artificial Intelligence Basics
- Microsoft Office
- Fast Learning
- Problem Solving
- Communication
- Teamwork

PROJECTS

AI Courtroom Simulation Project – King Abdulaziz University

May 2025

- Led a multimedia storytelling project using AI tools like ChatGPT, InVideo, and ElevenLabs.
- Simulated a courtroom scenario discussing the legal and ethical role of AI in Saudi Arabia.
- Managed scriptwriting, audio design, and visual coordination using modern AI platforms.

Note App – Software Design Patterns Project – King Abdulaziz University

May 2025

- Developed a desktop note-taking application using multiple design patterns: Command, Singleton, Decorator, and Facade.
- Implemented the Command Pattern to allow actions like undo/redo.
- Collaborated with team members to build and present the architecture and features.

Cybersecurity Awareness Project – King Abdulaziz University

April 2025

- Designed an educational poster for Poster Day to promote password protection awareness.
- An interactive game allowing users to test password strength against hacking scenarios.
- Raised cybersecurity awareness through visual design and practical engagement.

Technical Support System – Java Application for Jeddah Municipality

December 2024

- Created a basic technical support application using Java and the XP Agile methodology.
- Implemented user features like viewing complaint history and accessing help documentation.
- Practiced object-oriented programming and modular design principles

Vacation Travel App – UI/UX Design Project - King Abdulaziz University

September 2024

- Designed a complete travel booking mobile application using Figma.
- Focused on creating an intuitive user interface that allows users to browse, select, and book vacation packages.
- Applied user-centered design principles to ensure accessibility and ease of use.
- Developed wireframes, interactive prototypes, and visual assets as part of a UI/UX course project.

VOLUNTEERING

Poster Day Participant – King Abdulaziz University

Information Technology Department – Jeddah, Saudi Arabia

April 2025

- Designed an awareness poster about the importance of password protection as part of the university's Poster Day event.
- Highlighted best practices for creating strong passwords and preventing unauthorized access.
- An interactive game where users entered sample passwords and received real-time feedback on how long it would take hackers to crack them.
- Contributed to promoting cybersecurity awareness among students in an engaging and informative way.

COURSES

- **Information security (2025)** - dorooob
- **Java Programming Course (2022)** – Flex Courses (Completed)
- **JavaScript Programming Course** – Flex Course (In Progress)

LANGUAGES

Arabic / Native

English / Proficient
